

NORTHWIND ADDITIVE · KEY PERSONNEL

Dana Reyes, Chief Executive Officer and Principal Investigator

Fifteen years in structural materials, previously lead process engineer for precast operations at a top-five North American concrete supplier. Holds a PhD in Civil Engineering from Ohio State. Named inventor on both company patents.

Marcus Whitfield, Chief Technology Officer

Robotics and controls. Built the gantry motion stack and the closed-loop extrusion controller. Twelve years in industrial automation, six of them in additive manufacturing.

Priya Raghunathan, Materials Lead

Binder chemistry and admixture design. Developed the four-hour cure formulation. Previously a research chemist at a national laboratory cement program.
